Fry, Hannah, "Hello World: Being Human in the Age of Algorithms"
ISBN:978-0393634990

Strunk & White, "Elements of Style"
https://www.gutenberg.org/ebooks/37134

Abelson, Ledeen & Lewis, "Blown to Bits: Your Life, Liberty & Happiness
After the Digital Explosion"
http://www.bitsbook.com/wp-content/uploads/2008/12/B2B_3.pdf
Another title worth adding to your tech policy reading list. The authors
survey a broad swath of tech policy territory — privacy, search,
encryption, free speech, copyright, spectrum policy — and provide the
reader with a history and technology primer on each topic.

Written in 2008, it is a bit dated but that's not a problem. Nice
companion/parallel to the Hello World book. This one is free.

Bush, Vannevar, "As We May Think"
Atlantic Monthly, https://www.w3.org/History/1945/vbush/vbush.shtml
One of the seminal essays on computing written in 1945. Read and be
prepared to discuss it during the first week of class.

An Intro to Python book - Still deciding which one to use. No rush, won't
get to the programming part for a few weeks.
